

# COMPACT®-CORRUGATED ROLL

Exploit the logistical advantage

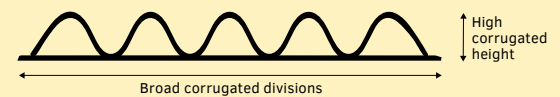

## LOW VOLUME – GREATER RUN LENGTH

Thanks to its strength and compact corrugated divisions, the ComPackt® roll offers excellent cushioning and padding characteristics – despite its low volume – and impresses through its considerably greater run length (fewer roll changes). In addition to logistics, the benefits of the ComPackt® roll are also evident in the product protection it offers and its ease of processing. The absolute advantage when compared to the C and B-flute:

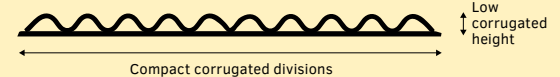

- **114 % VOLUME ADVANTAGE OVER C-FLUTE**
- **43 % VOLUME ADVANTAGE OVER B-FLUTE**
- **100 INSTEAD OF 70 LINEAR METRES**
- **6 INSTEAD OF 4 ROLLS PER LAYER**
- **SUITABLE FOR HIGH-BAY STORAGE**
- **FOR EXAMPLE, 80 CM ROLL WIDTH:  
C-FLUTE 224 M<sup>2</sup>/LAYER  
COMPACT® FLUTE 480 M<sup>2</sup>/LAYER**

### COMPACKT

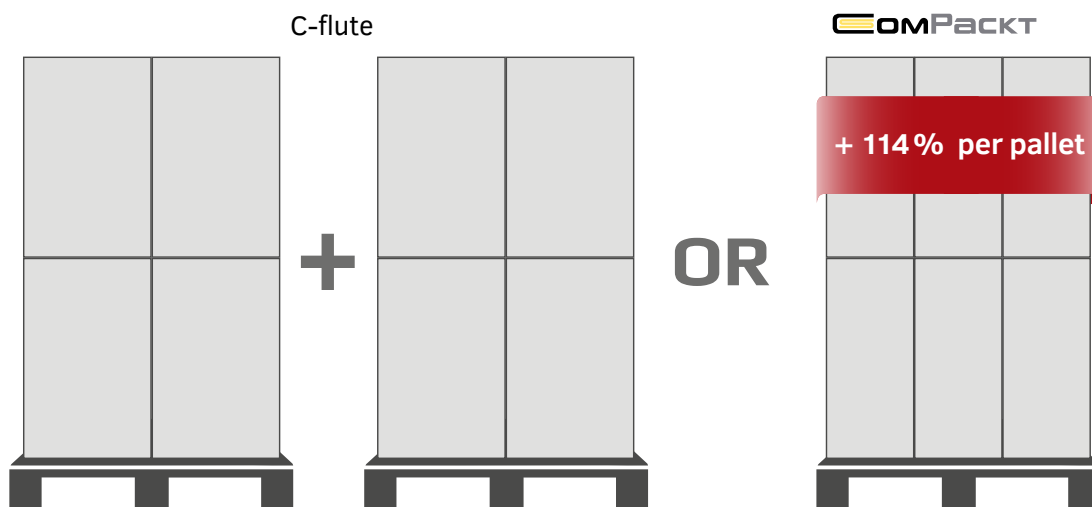

#### C-flute

#### ComPackt® flute

- More material per pallet
  - » Reduced storage costs
  - » Optimised logistical costs

Occupies only half as much  
warehouse and freight space!
