

DUO-PACK XL

Foam & paper-laminated double wall board for special requirements

EXTRA DURABLE

DUO-Pack XL is an extremely rigid and durable combination of cushioning double wall board (BE-roll) and a choice of surface-protecting PE foam or paper lamination. PE foam, which repels water, is particularly suitable for delicate surfaces. Use of this corrugated cardboard is especially popular in the timber processing industry and by furniture manufacturers (e.g. for protecting kitchen and living room furniture with scratch-sensitive surfaces). DUO-Pack XL is used here primarily for outer packaging and repackaging. We produce DUO-Pack XL for you with uniform or, if requested, individual creasing.

On the roll, DUO-Pack XL is the ideal basic material for the "box off the roll" that you can produce individually on site on our packaging machines.

- Roll width: up to 2,400 mm
- Standard roll length: 130 lm
- Foam and paper lamination
- Uniform or individual creasing
- Pre-cut sheets possible
- Basic material for VariPack ("box off the roll") and VariProtect XL ("off-the-roll edge protection")
