

# DUO-PACK SOFT

Particularly soft on sensitive surfaces

## EXTRA-SOFT FLEECE SURFACE

DUO-Pack Soft is an environmentally friendly single-sided fleece-laminated packaging material available in rolls or formats. The extra-soft and breathable inner lamination of cellulose-based paper fleece ensures that even particularly sensitive surfaces can be optimally protected.

DUO-Pack Soft therefore combines the best characteristics of different materials. It is light, flexible and hard-wearing and avoids transportation damage and resulting claims, thanks to the double protection provided by the packaging itself.

Whether glass, porcelain, wood, metal, furniture or spare parts are involved – DUO-Pack Soft can be used for every application and is completely recyclable.

- Rolls and formats in individual dimensions
- Roll widths: 100–2,400 mm
- Standard roll length: 140 lm
- Single-sided fleece lamination
- Available on request with narrow or individual creasing
