

# FORMPACK

The eco-friendly alternative

## CUSHIONS AND PROTECTS

Formpack is an environmentally friendly alternative to conventional bubble wrap. In comparison, Formpack offers a significant price and space advantage:

- **FORMPACK, 800 MM ROLL WIDTH:**  
12 ROLLS/STOCK = 672 M<sup>2</sup> (minimal pallet overhang)
- **BUBBLE WRAP, 800 MM ROLL WIDTH:**  
4 ROLLS/STOCK = 320 M<sup>2</sup> (high pallet overhang)

The embossed material has excellent padding properties and an extremely high absorptive capacity. Therefore, this paper is perfectly suited for padding, for space layers or for covering and it provides the best protection against transport damages and humidity. Formpack is available in reels or sheets in customized dimensions.

Formpack consists of 100% recycled paper, without chemical additives and is fully recyclable.

## FORMPACK

- Standard grammage: approx. 125 g/m<sup>2</sup>
- Roll width: 200–2,450 mm
- Standard roll length: 70 m
- Colour: natural
- 12 rolls per stock

We offer the cutting machine **VariProtect® 800** as an automated solution for the processing of Formpack to individual sheets on site.
