

PAPERBELT TRANSFER SYSTEM

The optimum addition to the PaperJet®

SUPPLIES UP TO 12 PACKING STATIONS

The PaperBelt transfer system ensures a continuous supply of paper cushioning in a predefined length to each packing station. Using the PaperBelt enables you to exploit the high production speed of the PaperJet® to the maximum, making it possible to supply up to 12 packing stations from a single machine. Paper cushioning is diverted for this purpose to the packing stations in storage containers specially provided for this purpose. An overview of your advantages:

Productivity advantage

- Reduction of packing times
- Legwork is reduced

Ergonomic and health advantage

- Upholstery withdrawal at adapted working height
- Rapid and particularly easy loading intervals
- No noise pollution in the packing station

Cost advantage

- Reduction of system costs
- Reduced maintenance effort

Space advantage

- Centralised material stored independent of packing station
- Packing station space is free of machinery

PaperBelt components:

- 1 PaperJet®
- 2 Pallet with eco-friendly ComPackt® paper
- 3 Conveyor belt
- 4 Paper switch
- 5 Storage container with cushioning removal

We help you to configure the optimum solution for each workplace situation individually from core system components.
