

CARDBOARD BOXES & PRE-CUT SHEETS

Eco-friendly recycling quality – Made in Germany

CREASED, SLOTTED & STAMPED

Single or double corrugation? We supply **cardboard boxes** in different dimensions as stock items. We also offer favourable prices and the highest quality for custom-made products, including stamped versions, all available in even small quantity orders.

We can produce samples for you on request, so you can test your packaging prior to use and determine the best solution for you.

Pre-cut cardboard sheets are particularly suitable as intermediate layers to stabilise individual package levels or stacked goods on pallets. They therefore contribute to transportation and storage safety and protect your goods against slipping and damage. While the standard version has EUR pallet dimensions, other individually customised sizes can also be produced. All paper used is primarily of eco-friendly recycling quality.
