

PACKAGING PAPER

Grey chip paper, natron paper & tissue paper

**PROTECTION MADE OF
100% RECYCLED PAPER**

Our paper production provides you with packaging papers in a variety of first-class qualities for every application – in standard sizes and individual dimensions. Whether used for packing, bundling, lining or as an intermediate layer, we provide you with the perfect paper for every application, as rolls or pre-cut sheets and in a variety of grammages.

Our packaging papers fill intermediate spaces in cardboard boxes perfectly and fix goods securely in the package to prevent slipping during transportation and storage. Grey chip and tissue papers in particular are distinguished by very soft haptic properties, making them both flexible and easy to shape. All packaging papers consists 100% of recycled paper.

In addition, we can provide you with machine solutions adapted to your production process that ensure rapid and ergonomic processing of our recycled papers.
