

PACKAGING TUBES

Uncomplicated packaging for long objects

PE FOAM & PAPER LAMINATION

Whether laminated with paper or PE foam for sensitive surfaces, our packaging tubes provide optimum protection for your products. They are equally suitable for long objects (engineering components, furniture, tools), all-round protection for long and delicate products (strips, pipes and sections) and bent products such as chair and table legs.

Your advantage: You can adapt the length of our packaging tubes to your individual applications. Handling is easy, as our packaging tubes are rolled while flat, easy to straighten and can be speedily readied for use.

- Wide flat: 50–360 mm
- Standard roll length: 70/100 m
- Precision use in individually customised lengths
- Pre-cut sheets possible
- Standard versions also available in small quantities
