

**VARI PROTECT**

**VARIPROTECT® 800**  
INDIVIDUAL CUTTING TO MEASURE

# VARIABLE CUTTING SYSTEM FOR CORRUGATED CARDBOARD & PACKING PAPER

## VariProtect® – fully automatic, saves space and money

The VariProtect® 800 is an extremely compact cutting system which is easy to operate and designed for a sheet width of up to 800 mm. The VariProtect® enables time-saving and simple cutting of corrugated rolls and packing paper in any lengths using a pedal or hand switch or, alternatively, in sensor-controlled extraction mode.

The cutting length and quantity can be optionally pre-configured using an innovative control panel. In standard mode, the cutting length can also be defined using the foot switch. With zero wastage, maximum flexibility and minimum material and logistical costs, the machine is ideal for eco-friendly materials such as ComPackt® corrugated cardboard, DUO-Pack and FormPack. The VariProtect® 800 cutting system is available in a table top or undertable version and can be equipped with up to 8 rolls.

Control panel for easy configuration of speed, length and quantity.

## Your one-stop provider – Made in Germany

Production of the machine and paper conserves resources, conforms to the latest technical standards and is realised in Germany with the assurance of ISO 50001 certification.

**100% conservation of resources**  
We produce particularly eco-friendly corrugated rolls and packing paper in a variety of lengths and widths for the VariProtect®. All materials are FSC® certified.

## Technical data

### System

Width: approx. 1,050 mm  
Length: approx. 210 mm  
Height: approx. 230 mm  
Weight: approx. 45 kg  
Feed: 1.5 m/s, up to 30 cuts/min.

### Stand variants:

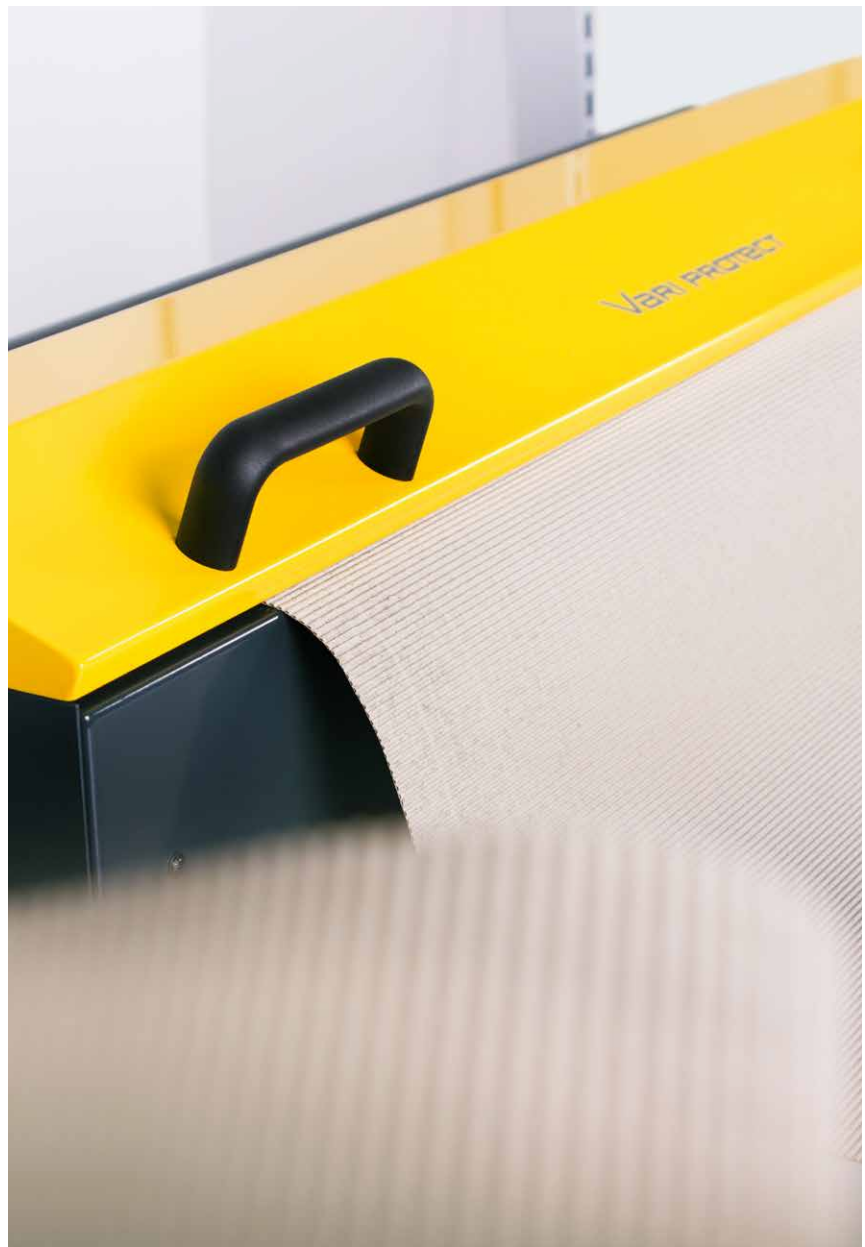

Available as table top or undertable version

### Accessories:

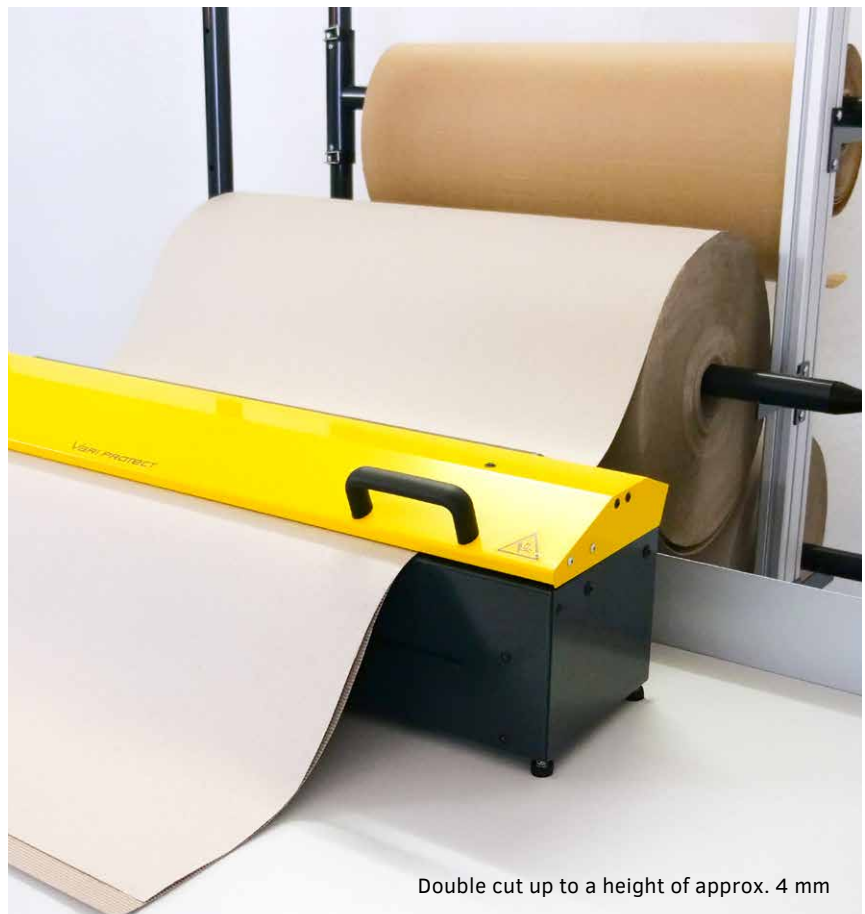

Roll holder for up to 8 rolls

### Corrugated cardboard and packing paper

Grammage: Different qualities  
Basis: 100 % recycled paper  
Environmental certificate: FSC® seal (FSC® C151439)  
Country of manufacture: Germany  
Paper/Machine: Germany

Eco-friendly corrugated rolls and packing paper in a variety of lengths and widths

Double cut up to a height of approx. 4 mm
